Integrate Flask with Scoring Endpoint:

```
In [22]: model_id = uwl_client.repository.get_model_id(model_details)
        model_id

Out[22]: '8852c589-045d-4e8e-a2cb-8f580f3b46a8'

In [24]: # Set meta
        deployment_props = {
            uwl_client.deployments.ConfigurationMetadata.NAME: DEPLOYMENT_NAME,
            uwl_client.deployments.ConfigurationMetadata.ONLINE: {}
        }

In [25]: # Deploy
        deployment = uwl_client.deployments.create(
            artifact_xid=model_id,
            meta_props=deployment_props
        )

=====
Synchronous deployment creation for xid: '8852c589-045d-4e8e-a2cb-8f580f3b46a8' started
=====

initializing
Note: online_url is deprecated and will be removed in a future release. Use serving_url instead.
ready

=====
Successfully finished deployment creation, deployment_xid='7f67cbed-62d2-413b-9901-b2a72887ac82'
```
